

# MOOP MAP 2016

**HIGH IMPACT ZONE**  
 These are the problem areas, the sore spots on the map. Macro MOOP (bags of rubbish, poles, large amounts of fires ect) and micro MOOP (glass, stompies, diamantes etc) were found in large quantities here. If we don't pick it up it will stay there forever.  
 Get a waste system in place, give someone the responsibility of checking the site for potential MOOP disasters, so next year you can kick these dirty habits and go green.

**MODERATE IMPACT ZONE**  
 Leave No Trace means that after the event, there should be nothing on the ground. Not those stompies you stepped over, the cable ties you cut and let drop, that lemon slice you shook out of your cup when you poured a new drink. Next year, set yourself a higher standard and be more aware of your wastage. Remember the micro MOOP so next year your camp can be a shiny green you can be proud of.

**LOW IMPACT ZONE**  
 YES! This is what we want! No MOOP left behind. Keep up the good work burners.

**WIND-BLOWN MOOP**  
 The winds got a little intense this year. As a result, a lot of MOOP was blown out of camps and into the surrounding areas. Remember to keep your camp clean to prevent accidental MOOPing.

## MOOP KEY

- UNCLEANED FIRE
- ASH DUMP
- GARBAGE BAGS
- POO
- SWEEPED GROUND
- REBAR IN GROUND
- HAY/MIELIE HUSKS
- WOOD (POLES, PALLETS, FIREWOOD)
- LEAVES

## AREAS NOT SHOWN

- GATE  
 Several dumped bags of garbage, remember if you bring it in, you take it home. Self reliance means you don't expect others to clean up after you.
- R355  
 Just because you have left the site, doesn't mean the Leave No Trace principles no longer apply. You have to carry that MOOP all the way back to your outside world home.
- AIRSTRIP HQ  
 If we have to pick things up with both hands, then your site is the wrong kind of sparkly.
- AIRSTRIP & AIRSTRIP ROAD  
 Hurray for clean desert!
